General Statistics

The General Statistics table includes statistics for hits, page views, visitor sessions, and visitors for this server during the designated time frame.

Statistics - Report Range: 03/13/2002 00:00:00 - 03/31/2002 23:59:59

Hits	Entire Site (Successful)	55,654
	Average Per Day	2,929
	Home Page	98
Page Views	Page Views (Impressions)	15,730
	Average Per Day	827
	Document Views	13,970
Visitor Sessions	Visitor Sessions	4,400
	Average Per Day	231
	Average Visitor Session Length	00:07:59
	International Visitor Sessions	5.47%
	Visitor Sessions of Unknown Origin	31.65%
	Visitor Sessions from United States	62.86%
Visitors	Unique Visitors	2,709
	Visitors Who Visited Once	2,177
	Visitors Who Visited More Than Once	532

General Statistics - Help Card

The Statistics table shows the date and time the report was generated. All dates and times refer to the location of the system running the analysis.

Timeframe - Beginning date and time of the log file.

Hits - A count of successful hits for the document not including the supporting graphic files on the page. Files considered web pages are those with the following extensions: .htm, .html, .asp, and a few others. These are defined by the File Types tab in the Options window.

The total number of hits - A count of all successful hits including HTML pages, pictures, forms, scripts, and downloaded files.

Tip: Visit http://www.webtrends.com/support/hits_views_sessions.htm for a detailed explanation of pages and visitor sessions.

Hits: Entire Site (Successful) - A count of hits that had a "success" status code.

Hits: Average Per Day - Number of Successful Hits divided by the total number of days in the log.

Hits: Home Page - Number of times the home page was visited. This statistic is derived from the Home

General Statistics - Help Card

Page settings in the profile.

Page Views (Impressions): Total - A count of hits to pages defined as documents or forms in the File Types tab. You can define how forms and documents are counted by modifying the Document Extensions and File Types settings. The supporting graphics on pages are not counted.

Page Views: Average Per Day - Number of page views (impressions) divided by the total number of days in the log.

Page Views: Document Views - A count of hits to pages that are considered documents as defined by the File Types tab in the Options window. This does not include files that have been defined as forms.

Visitor Sessions: Total - A count of the visitor sessions to your site. The length of a visitor session is defined in the General tab in the Options window.

Average Number of Visitor Sessions Per Day - Number of visitor sessions divided by the total number of days in the log.

Average Visitor Session Length - Average of non-zero length visitor sessions in the log.

Visitor Session for International, Unknown, and the United States summarize the origin of visitors in percentages of hits. Geographic location is logged in the User Domain field. How it is reported is determined by the Domains tab in the Options window.

Visitors - A count of unique IPs for the period of the report, whether or not they were authenticated using domain names or cookies.

Visitors: Unique Visitors - Unique visitors are counted using the visitor's IP address, domain name, or cookie. Persistent cookies are defined in Cookies tab in the Options window. Cookies give the most accurate count.

Visitors: Visitors Who Visited Once - A count of visitor sessions that occurred only once throughout the log file.

Visitors: Visitors Who Visited More Than Once - The count of visitor sessions that appeared more than once in the log file. By default a visitor session is 30 minutes.

The General Stats table gives a general overview of the Web site's performance and your visitor's behavior, helping you quickly assess areas to address. It can determine the report chapters to focus on for valuable site enhancement statistics.

Most Requested Pages

This section identifies the most popular web site pages and how often they were accessed. The average time a visitor spends viewing a page is also indicated in the table.

Most Requested Pages - Help Card	
<p> This section identifies the most popular pages on the site. The number of views includes only the successful hits for the page itself. It does not include any hits for graphics, audio or video files. The percentage of total views is the percentage of hits for that page compared to all other page types.</p> <p>Tip: The types of files included in this table can be configured using the File Types tab in the Options dialog box.</p> <p>Tip: You can list all pages on the site by selecting a number of elements higher than the number of pages on the site.</p>	
<p> Most likely these pages are requested the most because of their content and design. Based on the theory that the most requested pages have effectively attracted visitors, you can use similar elements and approaches to improve the less popular pages. Consider the average view times to determine which content holds visitor's attention.</p>	

Least Requested Pages

This section identifies the least popular pages on your Web site, and how often they were accessed.

Least Requested Pages

Least Requested Pages - Help Card

 This section identifies the least popular pages on your Web site. The number of views only includes the successful hits for the page itself. It does not include any hits for graphics. The percentage of total views is the percentage of hits for that page compared to all other pages.

Tip: The types of files included in this table can be configured using the File Types tab in the Options dialog box.

Tip: You can list all pages on the site by setting the number of elements to a number higher than the number of pages on the site.

 There are many reasons that these pages are requested the least. Consider the content and the navigational tools or descriptions available to guide visitors to them. How do these pages differ from those that are most requested? Do the average view times indicate visitors are not attracted long enough to convey your message? This table may indicate areas on your site that may need attention.

Top Entry Pages

This section identifies the first page viewed when a visitor visits this site. This is most likely your home page but, in some cases, it may also be specific URLs that visitors enter to access a particular page directly. The percentages refer to the total number of visitor sessions that started with a valid Document Type. If the session started on a document with a different type (such as a graphic or sound file), the file is not counted as an Entry Page, and the session is not counted in the total.

Top Entry Pages			
	File	% of Total	Visitor Sessions
1	Plant Materials Program http://plant-materials.nrcs.usda.gov/	41.06%	1,145
2	Plant Materials Program http://plant-materials.nrcs.usda.gov/header.html	6.2%	173

Total For the Pages Above		73.24%	2,042

Top Entry Pages - Help Card

 This section identifies the pages visitors first saw when they entered this site. This is most likely your home page but, in some cases, it may also be specific URLs that visitors enter to access a particular page directly. For example, if a visitor enters <http://www.WebTrends.com/WT-QA.HTM>, he/she entered at the WT-QA.HTM page.

Percentages refer to the total number of visitor sessions that started with a valid Document Type. If a session started on a document with a different type (such as a graphic or sound file), the file would not be counted as an Entry Page, and the session is not included in the total. Such sessions are often the product of other sites referencing a specific downloadable file or graphic for example on your site. In such cases, a session may have a single hit to a non-document type file, and will not be counted for the percentage calculations.

Also, web servers do not always log hits in perfect chronological order. For example, a hit to a GIF file can appear in the log before the hit to the HTML page that refers to this GIF.

Tip: Consider using the Entry Page filter to include or exclude entire visitor sessions based upon the first page a visitor viewed.

 This statistic can indicate how you might want to optimize the architecture of your site based on where visitors are entering. You can also determine which external links to your site are most effective. Consider updating meta-tags and links.

Total For the Requests Above		54.75%	2,409

Top Entry Requests - Help Card

 This section identifies the first hit from visitors coming to this site. This is most likely the home page but, in some cases, it may also be specific URLs entered to access a particular file directly. For example, if a visitor enters <http://www.WebTrends.com/WT-QA.HTM>, he/she enters at the WT-QA.HTM page. The percentages refer to the total number of visitor sessions.

Tip: Consider using the Entry Page filter to include or exclude entire visitor sessions based upon the first page a visitor viewed.

 Consider what is catching the attention of visitors most quickly and effectively.

Least Requested Entry Requests

This section identifies the first hit from a visitor visiting this site. This is most likely the home page but, in some cases, it may also be specific URLs that visitors enter to access a particular file directly. The percentages refer to the total number of visitor sessions.

Total For the Pages Above (only sessions starting on a valid document type are included)		58.85%	1,641

Top Exit Pages - Help Card	
?	This section identifies the pages visitors were on when they left the site. These percentages refer to the total number of visitor sessions that started with a valid Document Type. If the session started on a document with a different type (such as a graphic or sound file), the file is not counted as an Exit Page, and the session is not counted in the total. Such sessions are often the product of other sites referencing a specific downloadable file or graphic for example on the site. In such cases, a session may have a single hit to a non-document type file, and will not be counted for the percentage calculations.
💡	Use this statistic to determine your visitors' satisfaction with their visits. Visitors may have left this page once they found what they were looking for, or they have lost interest or determined the content didn't apply, or for many other reasons. For example, if your top exit page is your home page, this may be an indication that you need a better approach.

Single Access Pages

This section identifies the pages on the site that visitors access and exit without viewing any other page. The percentages refer to the total number of visitor sessions that started with a valid Document Type. If the session started on a document with a different type (such as a graphic or sound file), the file is not counted as a Single Access Page, and the session is not counted in the total

Single Access Pages - Help Card	
	This section identifies the pages on the site that visitors access and exit without viewing any other page. This demonstrates where visitors enter and leave immediately. These percentages refer to the total number of visitor sessions that started with a valid Document Type. If the session started on a document with a different type (such as a graphic or sound file), the file is not counted as a Single Access Page, and the session is not included in the total.
	This information can be helpful when considering the design of the site with respect to the type of visitors. Consider how well these pages convey your message. Do they need improvement to extend visitor sessions, or is it possible that are you attracting the wrong visitors with references to your site?

Most Accessed Directories

This section analyzes accesses to the directories of the site. This information can be useful in determining the types of data most often requested.

Most Downloaded File Types - Help Card

This section identifies the accessed file types and the total kilobytes downloaded for each file type. Cached requests and erred hits are excluded from the totals. The types of files downloaded are listed in decreasing order of the number of file downloads, and the number of kilobytes transferred is given for each file type.

Tip: You can use the File Types tab in the Options dialog box to specify the types of files included in this table. **Tip:** To focus your report, consider using the File filter to include or exclude files or file types.

This provides a general statistic for the type of data visitors are interested in downloading from your site. Use this to consider which download types require improvements for better conveying your message.

Dynamic Pages & Forms

This section identifies the most popular dynamic pages and forms executed by the server. WebTrends counts any line with a Post command or a Get command with a "?" as a dynamic page, and shows only successful hits.

Dynamic Pages & Forms				
	Dynamic Pages	No. of Pages	% of Total	Visitor Sessions
1	http://plant-materials.nrcs.usda.gov/mtpmc/	11	0.62%	11
2	http://www.plant-materials.nrcs.usda.gov/_vti_bin/_vti_aut/author.dll	1,722	97.84%	4
3	http://www.plant-materials.nrcs.usda.gov/_vti_bin/shtml.dll	4	0.22%	4
4	http://plant-materials.nrcs.usda.gov/_vti_bin/shtml.dll	6	0.34%	3
5	http://plant-materials.nrcs.usda.gov/_vti_bin/_vti_aut/author.dll	4	0.22%	3
6	http://www.plant-materials.nrcs.usda.gov/_vti_bin/_vti_adm/fp admdll.dll	13	0.73%	1

Dynamic Pages & Forms - Help Card

This section shows the dynamic pages and forms that are used the most.

If you have a dynamic site, this table can be used with the Most Requested Pages table to determine your most popular pages. In addition, you can also use this information to place ads of higher value on the most popular pages.

Visitors by Number of Visits During Report Period

This section shows the distribution of visitors based on how many times each visitor visited your site.

Visitors by Number of Visits During Report Period

Number of Visits	Number of Visitors	% of Total Unique Visitors
1 visit	2177	80.36%
2 visits	251	9.26%
3 visits	97	3.58%
4 visits	63	2.32%
5 visits	23	0.84%
6 visits	20	0.73%
7 visits	15	0.55%
8 visits	5	0.18%
9 visits	6	0.22%
10 or more visits	52	1.91%

Visitors by Number of Visits During Report Period - Help Card

? This section shows the distribution of visitors based on how many times each visitor visited your site. This covers visits made during the reporting period only; a visitor's visits before or after the reporting period do not contribute to the visitor's visit count.

💡 This statistic is an indication of whether or not your site compels return visits. Updating web site content is one way to improve this statistic.

New vs. Returning Visitors

This section shows the number of first-time visitors to your site and the number of returning visitors to your site. Only visitors identified by cookies are counted. First-time visitors are those who didn't have a cookie on their 1st hit, but had one on later hits. Returning visitors are those who already had a cookie on their 1st hit (their previous visit happened before the start of this report period.)

New vs. Returning Visitors

New or Returning Visitor	Number of Visitor Sessions	% of Total Sessions
Unknown	4,400	100.00%

New vs. Returning Visitors - Help Card

? This section shows the number of first-time visitors to your site and the number of returning visitors to your site. Only visitors who can be identified with cookies are counted. First-time visitors are those who didn't have a cookie on their 1st hits, but had one on later hits. Returning visitors are those who already had a cookie on their 1st hit, and whose previous visit happened before the start of this report period. To get the most accurate information, make sure you set up the Cookies tab in the Options window to properly interpret the cookies you give to visitors.

💡 By considering the ratio between new and returning visitors over a period of time, you can determine if your site is adequately attracting repeat visits. If you consistently have a high number of returning visitors, congratulations; you're doing a good job! However, if you are accustomed to seeing a low number of returning visitors, it's time to figure out why.

Top Authenticated Visitors

This section identifies the true name and relative activity level of the visitors logging onto a server that requires user name and password. You may find more authenticated visitors than visitors (in the following table) as several persons may be using the same IP address. Since many ISPs dynamically assign IP addresses, and since multiple visitors may come from a single IP address, authentication is a much more accurate way to identify top visitors.

Top Authenticated Visitors

	Visitor	Hits	% of Total Hits	Visitor Sessions
1	Thunderbolt\ANelson	1,725	100%	5
Total		1,725	100%	5

Top Authenticated Visitors - Help Card

This section shows the authenticated users who visited your site the most.

You may use this information for your marketing efforts, such as special promotions or newsletters.

Top Visitors

This section identifies the IP address and/or domain name and their relative activity level on the site. If you do not use WebTrends cookies to track sessions on the site, WebTrends cannot differentiate between hits from different visitors of a same IP.

Top Visitors				
	Visitor	Hits	% of Total Hits	Visitor Sessions

Total		55,654	100%	4,400

Top Visitors - Help Card

 This section identifies IP addresses and/or domain names of visitors and their relative activity level. If you use WebTrends cookies to track sessions on the site, WebTrends can differentiate hits from visitors with the same IP address.

Tip: Consider the Visitor Address Filter to include or exclude activity based on visitor IP or domain.

 Consider the visitors who use the site most, and tailor your site to their interests and needs. If this is an intranet, notice which employees use the site the most and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Top Geographic Regions

This section identifies the top locations of the visitors to the site by geographic region. The geographic region of the visitor is determined by the suffix of their domain name. Use this information carefully because this information is based on where the domain name of the visitor is registered, and may not always be an accurate identifier of the actual geographic location of this visitor. For example, while a vast majority of .com domain names are from North America, there is a small minority of domain names that exist outside of North America.

Top Geographic Regions

	Geographic Regions	Visitor Sessions
1	North America	2,835
2	Region Un-Specified	1,393
3	Western Europe	61

Total For the Log File		55,654	100%	4,400

Most Active Organizations - Help Card

 This section identifies the companies or organizations that accessed the site the most often. If the DNS lookup option is set to "Always" or "Automatically," WebTrends searches for the domain name in the company database, and includes the company name and geographic information in the graph and table. If reverse DNS lookups are not performed, either by WebTrends or by the server, only IP addresses are listed. The table lists companies and organizations in decreasing order of the number of hits.

 Determine how your e-business can be improved according to how businesses are using your site. Consider how your product can be made more attractive to organizations that have shown interest.

Organization Breakdown

This section provides a breakdown by types of organizations (.com, .net, .edu, .org, .mil, and .gov.) This information can only be displayed if reverse DNS lookups have been performed, and the percentages refer to the total of hits for which the organization type can be determined (some IPs cannot be resolved to a domain, and therefore an organization type cannot be determined).

Organization Breakdown

	Organization Type	Hits	% of Total Hits	Visitor Sessions
1	Commercial	7,312	20.51%	1,378
2	Network	12,909	36.22%	716
3	Government	12,283	34.46%	465
4	Education	2,089	5.86%	175
5	Military	697	1.95%	29
6	Organization	296	0.83%	25
7	Arpanet	51	0.14%	3
Total for Known Organization Types		35,637	100%	2,791

This information can only be provided if reverse DNS lookups have been performed, and the percentages refer to the total of hits for which the organization type can be determined (some IPs cannot be resolved to a domain, and therefore an organization type cannot be determined).

💡 Consider what type of organization is interested in your site and how you can attract other types.

Summary of Activity for Report Period

This section outlines general server activity, comparing the level of activity on weekdays and weekends. The Average Number of Visitors and Hits on Weekdays are the averages for each individual week day. The Average Number of Visitors and Hits for Weekends groups Saturday and Sunday together. Values in the table do not include erred hits.

Summary of Activity for Report Period	
Average Number of Visitor Sessions per day on Weekdays	267
Average Number of Hits per day on Weekdays	3,692
Average Number of Visitor Sessions for the entire Weekend	308
Average Number of Hits for the entire Weekend	2,549
Most Active Day of the Week	Mon
Least Active Day of the Week	Sat
Most Active Day Ever	March 18, 2002
Number of Hits on Most Active Day	6,053
Least Active Day Ever	March 14, 2002
Number of Hits on Least Active Day	673
Most Active Hour of the Day	10:00-10:59
Least Active Hour of the Day	03:00-03:59

Summary of Activity for Report Period - Help Card

 This section outlines general server activity, comparing the level of activity on weekdays and weekends. The Average Number of Visitors and Hits on Weekdays are the averages for each individual weekday. The Average Number of Visitors and Hits for Weekends groups Saturday and Sunday together. Values in the table do not include erred hits.

 This table is useful for determining the best day of the week to perform system maintenance. You can determine least popular and most popular use trends for development of the site.

Summary of Activity by Time Increment

This section helps you understand the bandwidth requirements of the site by indicating the volume of activity in kilobytes transferred. The table provides various measures of activity by unit of time for the report period (the unit of time depends on the amount of time covered by the report, and will be the day in most cases).

Summary of Activity by Time Increment				
Time Interval	Hits	Page Views	KBytes Transferred	Visitor Sessions
Wed 03/13/2002	1,528	1,507	742 K	2

Total Weekdays		48,005	86.25%	3,475
Total Weekend		7,649	13.74%	925

Activity Level by Day of the Week - Help Card

? This section shows the activity for each day of the week for the report period (i.e. if there are two Mondays in the report period, the value presented is the sum of all hits for both Mondays.) The table lists the number of hits, percentage of total hits and visitor sessions for each day of the week for the report period. Values in this table do not include erred hits.

Tip: Consider the Day of Week Filter to include or exclude activity based on the day of the week.

Days of less activity should be considered for maintenance and content improvement.

Activity Level by Hour of the Day

This section shows the most and the least active hour of the day for the report period. The second table breaks down activity for the given report period to show the average activity for each individual hour of the day (if there are several days in the report period, the value presented is the sum of all hits during that period of time for all days). All times are referenced to the location of the system running the analysis.

Activity Level by Hours Details

Activity Level by Hours Details			
Hour	# of Hits	% of Total Hits	# of Visitor Sessions
7:59am)			

Activity Level by Hour of the Day - Help Card

 This section shows the most and the least active hour of the day for the report period. The second table breaks down activity for the given report period to show the average activity for each individual hour of the day (if there are several days in the report period, the value presented is the sum of all hits during that period of time for all days). All times are referenced to the location of the system running the analysis. The table lists the percentage of total hits and visitor sessions, as well as the totals for work hours (8:00am - 5:00pm) and after hours (5:01pm - 7:59am).

Tip: Consider the Hour of Day Filter to include or exclude activity based on the time of day.

 This information is useful in determining what hour of the day is best for system maintenance.

Activity Level by Length of Visit

This section shows the number and percentages of visits and page views over selected visit lengths.

Activity Level by Length of Visit				
Visit Duration (Minutes)	Visits	Page Views	% of Total Visits	% of Total Views
0-1	3,663	5,531	83.25%	35.16%
1-2	163	1,090	3.7%	6.92%
2-3	82	664	1.86%	4.22%
3-4	54	427	1.22%	2.71%
4-5	42	318	0.95%	2.02%
5-6	38	420	0.86%	2.67%
6-7	37	364	0.84%	2.31%
7-8	24	179	0.54%	1.13%
8-9	20	197	0.45%	1.25%
9-10	23	239	0.52%	1.51%
10-11	13	205	0.29%	1.3%
11-12	14	127	0.31%	0.8%
12-13	14	118	0.31%	0.75%
13-14	10	169	0.22%	1.07%

17-18	11	149	0.25%	0.94%
18-19	10	76	0.22%	0.48%
> 19	149	5,078	3.38%	32.28%
Totals	4,400	15,730	100%	100%

Activity Level by Length of Visit - Help Card

? This section groups visitor sessions based on the their duration. For each grouping, the total number of visitors, and the total number of pages viewed is calculated. The accumulated totals for all of the visit duration groupings is shown at the bottom of the table.

💡 This information is useful for determining how long visitors look at your web site.

Number of Views per Visitor Session

This section shows the number and percentages of visits and page views versus the number of pages viewed.

Number of Pages Viewed per Visit		
Number of Pages Viewed	Number of Visits	% of Total Visits
0 pages	1,612	36.63%
1 page	1,052	23.9%
2 pages	145	3.29%
3 pages	56	1.27%
4 pages	633	14.38%
5 pages	217	4.93%
6 pages	149	3.38%
7 pages	94	2.13%
8 pages	80	1.81%
9 pages	57	1.29%
10 pages	57	1.29%
11 or more pages	248	0.81%
Totals	4,400	100%

Number of Views per Visitor Session - Help Card

? This section shows you how many visitors viewed one page, how many viewed 2 pages, ect. Number of Page Viewed is 0 indicates visitor sessions that access only non-page items (e.g. GIF, JPG).

💡 You can quickly see how many visitors look at just one page or more than one page. If most visitors are only viewing one page, it may be an indication that the page where they entered didn't effectively guide them to the content they needed.

Visitor Session Statistics

This section shows how many visitors viewed your web site and how long they stayed. The information is split up into time slices based on the duration of the log file.

Time Frame	Visitors	Unique Visitors	First-Time Visitors	Average Visit Length	Visitor-Minutes
Wed 03/13/2002	2	2	0	00:51:10	102

Visitor Session Statistics - Help Card

? The Visitor Session Statistics section shows visitor session activity for the reporting period. Visitors

Visitor Session Statistics - Help Card

are typically tracked using the cookie that's been defined or by their IP addresses.

Visitors shows the number of visitor sessions for each interval.

Unique Visitors shows the number of unique visitor sessions. If the entire column displays N/A, it may be because Limit Memory Usage was activated, and the amount of memory required to track individual visitor sessions was exceeded. A total count of visitors and visitor sessions is available in the General Statistics table.

First-Time Visitors shows the number of sessions that were attributed to known first-time visitors. You must use a persistent cookie on your web server and have defined it in the program to get this information.

Average Visit Length shows the average length of the visitor session for each interval. Sessions with a length of zero (i.e. a single page view) are included in the average.

Visitor-Minutes provides the total number of minutes that visitors viewed your site based on the sum of each visitor session for the interval.

You can use this information to:

Determine which intervals have the most traffic. You might watch for increases or decreases in traffic and consider the circumstances that may impact the change (an ad campaign, press release, competitor announcement).

Plan for acquiring new equipment> If you've noticed a trend in visitor traffic, you can plan for future needs. Compare new vs. repeat customers. How much activity is attributed to new visitors? Are established customers returning to your site?

Technical Statistics and Analysis

This table shows the total number of hits for the site, how many were successful, how many failed, and calculates the percentage of hits that failed. It may help you in determining the reliability of the site.

Technical Statistics and Analysis	
Total Hits	56,307
Successful Hits	55,654
Failed Hits	653
Failed Hits as Percent	1.15%
Cached Hits	9,763
Cached Hits as Percent	17.33%

Technical Statistics and Analysis - Help Card

 This table shows the total number of hits for the site, how many were successful, how many failed, and calculates the percentage of hits that failed. Failed hits are hits where a server or client error occurred. Cached hits are those where the page was found in the cache of the browser, so the server did not need to transfer the file.

 This section is useful in determining the reliability of the site.

Dynamic Pages & Forms Errors

This section shows the number of successful form submissions compared to the number that failed. WebTrends considers anything with Post command as a dynamic page.

Dynamic Pages & Forms Errors

Type	Hits	% of Total
Successful Forms Submitted	1,760	97.61%
Failed Forms Submitted	43	2.38%
Total	1,803	100%

Dynamic Pages & Forms Errors - Help Card

This section shows you errors that occurred for both dynamic pages and forms.

You want the percentage of forms that failed to be low, and if they're not, you need to find out why.

Client Errors

This section identifies the error codes from the browsers accessing your server.

Client Errors

Error	Hits	% of Failed Hits
404 Page or File Not Found	615	96.69%
403 Forbidden Access	19	2.98%
401 Unauthorized Access	2	0.31%
Total	636	100%

Client Errors - Help Card

? This section identifies the error codes from the browsers accessing your server. The table lists all the errors that occurred in order of number of failed hits.

Tip: To focus your report, consider using the Return Code Filter for including or excluding return code data.

💡 This is helpful for identifying the errors the client browser received and determining what maintenance is necessary.

Page Not Found (404) Errors

This section identifies pages that returned "Page Not Found" (404) errors on the server.

Page Not Found (404) Errors		
Target URL and Referrer	Hits	% of 404 Hits
/pfs/Available_species/ (no referrer)	18	2.92%

Top Search Engines - Help Card

 The first table identifies which search engines referred visitors to the site the most often. The second table breaks down the keywords used with each search engine referring your site. Note that each search may contain several keywords. Totals in this table represent the number of searches, whether they contain one or several keywords. The third table identifies the main keywords for each search engine.

 This can give you an idea of how your meta-tags are performing with each search engine.

Top Search Phrases

The first table identifies Phrases which led the most visitors to the site (regardless of the search engine).
The second table identifies, for each phrase, which search engines led visitors to the site.

Most Used Browsers - Help Card

This section identifies the most popular WWW Browsers used by visitors to the site. This information will only be displayed if your server is logging the browser/platform information. Also, any hits identified as originating from a spider are not counted in this table.

Tip: Consider the Browser Filter to include or exclude activity based on visitor browser.

Most Used Browsers - Help Card

This can be helpful for determining how to configure your site for optimal viewing.

Netscape Browsers

This section gives you a breakdown of the various versions of Netscape browsers that visitors to the site are using.

Netscape Browsers

	Browser	Hits	% of Total Hits	Visitor Sessions
1	Netscape 4.x	16,034	97.22%	763
2	Netscape 5.x	455	2.75%	25
3	Netscape 3.x	2	0.01%	2
Total For Browsers Above		16,491	100%	790

Netscape Browsers - Help Card

? This section gives you a breakdown of the various versions of Netscape browsers that visitors to the site are using. This information will only be displayed if your server is logging the browser/platform information. Any hits identified as originating from a spider are not counted in this table.

💡 This is useful in determining the percentage of visitors using newer browsers and whether version-specific features (such as Java Scripts) should be implemented on the site.

Microsoft Explorer Browsers

This section gives you a breakdown of the various versions of Microsoft Explorer browsers that visitors to the site are using.

Microsoft Explorer Browsers

	Browser	Hits	% of Total Hits	Visitor Sessions
1	Explorer 5.x	23,929	73.07%	2,265
2	Explorer 6.x	7,645	23.34%	787

10	Windows Win32s	2	0%	2
Total For Platforms Above		52,512	100%	4,328

Most Used Platforms - Help Card

? This section identifies the operating systems most used by the visitors to the site. This information will only be displayed if your server is logging the browser/platform information.

💡 This information is useful for determining what content to include on your website.

Glossary

Glossary	
Ad Clicks	A click on an advertisement on a web site which takes a visitor to another site, it is referred to as an ad click.
Ad Views	A web page that presents an ad. Once the visitor has viewed an ad, he/she can click on it (see Ad Click). There may be more than one ad on an ad view.
Authentication	Technique by which access to Internet or Intranet resources requires the visitor to identify himself or herself by entering a username and password.
Bandwidth	Measure (in kilobytes of data transferred) of the traffic on the site.
Browser	A program used to locate and view HTML documents (Netscape, Mosaic, Microsoft Explorer, for example.)
Click through rate	Percentage of visitors who click on a viewed advertisement. This is a good indication of the effectiveness of this ad.
Client	The browser (see above) used by a visitor to a Web site.
Client Errors	An error occurring due to an invalid request by the visitor's browser. Client errors are in the 400-range. See "Return Code" definition.
Company Database	The database installed and used by WebTrends to look up the company name, city, state and country corresponding to a specific domain name.
Cookies	Persistent Client-State HTTP Cookies are files containing information about visitors to a web site (e.g., user name and preferences). This information is provided by the visitor during the first visit to a Web server. The server records this information in a text file and stores this file on the visitor's hard drive. When the visitor accesses the same web site again, the server looks for the cookie and configures itself based on the information provided.
Domain Name	The text name corresponding to the numeric IP address of a computer on the Internet (i.e., www.webtrends.com).
Domain Name Lookup	The process of converting a numeric IP address into a text name (for example, 204.245.240.194 is converted to www.webtrends.com).
FTP	File Transfer Protocol is a standard method of sending files between computers over the Internet.
Filters	A means of narrowing the scope of a report or view by specifying ranges or types of data to include in or exclude.
Forms	An HTML page which passes variables back to the server. These pages are used to gather information from visitors. Also referred to as scripts.
GIF	Graphics Interchange Format is an image file format commonly used in HTML documents.
HTML	Hyper Text Markup Language is used to write documents for the World Wide Web to specify

Glossary	
	hypertext links between related objects and documents.
HTTP	Hyper Text Transfer Protocol is a standard method of transferring data between a Web server and a Web browser .
Hit	An action on the Web site, such as when a visitor views a page or downloads a file.
Home Page	The main page of a Web site. The home page provides visitors with an overview and links to the rest of the site. It often contains or links to a Table of contents for the site.
Home Page URL	The local path or Internet URL to the default page of the Web site for which WebTrends reports will be generated.
IP Address	Internet Protocol address identifying a computer connected to the Internet.
JPEG	Joint Photographic Expert Group - Compressed graphic format common on the Internet.
Log File	A file created by a web or proxy server which contains all of the access information regarding the activity on that server.
Page Views	Also called Page Impressions. Hit to HTML pages only (access to non-HTML documents are not counted).
Platform	The operating system (i.e. Windows 95, Windows NT, etc.) used by a visitor to the site.
Protocol	An established method of exchanging data over the Internet.
Referrer	URL of an HTML page that refers to the site.
Return Code	<p>The return status of the request which specifies whether the transfer was successful and why.</p> <p>Possible "Success" codes are:</p> <ul style="list-style-type: none"> 200 = Success: OK 201 = Success: Created 202 = Success: Accepted 203 = Success: Partial Information 204 = Success: No Response 300 = Success: Redirected 301 = Success: Moved 302 = Success: Found 303 = Success: New Method 304 = Success: Not Modified <p>Possible "Failed" codes are:</p> <ul style="list-style-type: none"> 400 = Failed: Bad Request 401 = Failed: Unauthorized 402 = Failed: Payment Required 403 = Failed: Forbidden 404 = Failed: Not Found 500 = Failed: Internal Error 501 = Failed: Not Implemented 502 = Failed: Overloaded Temporarily 503 = Failed: Gateway Timeout
Server	A computer that hosts information available to anyone accessing the Internet.
Server Error	An error occurring at the server. Web server errors have codes in the 500 range.
Spiders	An automated program which searches the internet.
Suffix (Domain Name)	The three digit suffix of a domain can be used to

Glossary	
	<p>identify the type of organization. Possible "Suffixes" are:</p> <ul style="list-style-type: none"> .com = Commercial .edu = Educational .int = International .gov = Government .mil = Military .net = Network .org = Organization
URL	<p>Uniform Resource Locator is a means of identifying an exact location on the Internet. For example, http://www.webtrends.com/html/info/default.htm is the URL which defines the use of HTTP to access the Web page Default.htm in the /html/info/ directory on the WebTrends Corporation Web site). As the previous example shows, a URL is comprised of four parts: Protocol Type (HTTP), Machine Name (webtrends.com), Directory Path (/html/info/), and File Name (default.htm).</p>
User Agent	<p>Fields in an extended Web server log file identifying the browser and platform used by a visitor.</p>
Visit	<p>Commonly called Visitor Session. All activity for one visitor of a web site. By default, a visitor session is terminated when a visitor is inactive for more than 30 minutes.</p>
Visitor Session	<p>A session of activity (all hits) for one visitor of a web site. A unique visitor is determined by the IP address or cookie. By default, a visitor session is terminated when a visitor is inactive for more than 30 minutes. This duration can be changed from General panel in the Options, Web Traffic Analysis dialog. Synonym: Visit.</p>
